

The 25th Congress of the Asian Pacific Society of Respiriology (APSR 2021)

Coffee Break seminar¹ during
The 25th Congress of the Asian Pacific Society of Respiriology (APSR 2021)
Co-sponsored by Boehringer Ingelheim

It is our pleasure to invite you to attend:

Progressive fibrosing ILD: the world beyond IPF

- Chair:** Prof. Yasuhiko Nishioka
(Department of Respiratory Medicine and Rheumatology, Graduate School of Biomedical Sciences, Tokushima University)
- Speaker:** Prof. Martin Kolb
(McMaster University and St. Joseph's Healthcare, Hamilton, Ontario, Canada)
- When:** Saturday 20 November 2021, 14:10-15:00 JST
- Where:** Room 1: Kyoto International Conference Center (1F Main Hall)
Takaragaike, Sakyo-ku, Kyoto 606-0001 Japan

Agenda

The presentation will discuss the progressive fibrosing ILDs beyond IPF. This will range from the overarching concept to the importance of an accurate diagnosis and the management strategies in clinical practice.

Time	Presentation	Speaker
14:10-14:13	Welcome and introduction	Prof. Yasuhiko Nishioka
14:13-14:53	Progressive fibrosing ILD: the world beyond IPF	Prof. Martin Kolb
14:53-14:58	Q&A session	Prof. Yasuhiko Nishioka Prof. Martin Kolb
14:58-15:00	Summary and conclusions	Prof. Yasuhiko Nishioka

This seminar will be held by Hybrid Format (in person +Online)
The registration for participating APSR 2021, Please check official web site.

Biographies

Prof. Yasuhiko Nishioka

Department of Respiratory Medicine and Rheumatology, Tokushima University, Japan

Dr. Yasuhiko Nishioka is a professor of the Department of Respiratory Medicine and Rheumatology, Graduate School of Biomedical Sciences, Tokushima University, Japan. He earned M.D. and Ph.D. from Tokushima University Graduate School. He had also learned at Pittsburgh University as a postdoctoral fellow. His major research interest is the cellular and molecular pathogenesis of pulmonary fibrosis including idiopathic pulmonary fibrosis (IPF). He has extensively studied the basic mechanisms of IPF with various animal models. In particular, he has focused his research on the growth factors such as platelet-derived growth factor (PDGF) and fibrotic hematopoietic cells, so called 'fibrocytes.' He has recently joined various global clinical trials including INPULSIS and INBUILD studies in IPF. He had also served as a member of the steering committee in the INMARK trial. He serves as a director of the Japanese Respiratory Society (JRS) and a chairman of the International Relations Committee in JRS, and a treasurer in the Asian Pacific Society of Respirology (APSR).

Prof. Martin Kolb

McMaster University, Hamilton, Ontario, Canada

Martin Kolb is the Jack Gauldie Boehringer Ingelheim Chair in Interstitial Lung Disease and the Director of the Division of Respirology, McMaster University, Hamilton, Ontario, Canada. His major research interests are fibrotic lung disease, with a particular interest in the role of growth factors and matrix abnormalities in disease progression. He leads activities in biomarker development for lung fibrosis, and is a Principal Investigator and steering committee member in numerous ILD clinical trials. Professor Kolb has authored over 250 peer-reviewed publications on different basic science and clinical topics. He is the Chief-Editor of the *European Respiratory Journal* (2018-2023). He is also an editorial board member of *American Journal of Respiratory and Critical Care Medicine*, *American Journal of Respiratory Cell and Molecular Biology*, *the European Respiratory Review* and *Respirology* and serves on the Lung Injury & Repair Study Section for the National Institute of Health.
